## **DETAILED ACTION**

### ***Priority***

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### ***Drawings***

2. The drawings are objected to because there are no arrows pointing to elements to show where and what they are. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required

corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Claim Objections***

3. Claims 34 and 35 are objected to because of the following informalities: "at least one projection device" in lines 1-2 should be changed to --the at least one projection device--. Appropriate correction is required.

### ***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 27-49 are rejected under 35 U.S.C. 102(b) as being anticipated by Ockelmann [EP 0 857 647 A1].

Regarding claims 27, 40 and 41 Ockelmann discloses an apparatus for display luminous radiation on a shell [7, 9] of an aircraft [1] having at least one light source [at 15] for producing luminous radiation, at least one projection device [17] for converting the luminous radiation into projectable luminous radiation, the at least one projection device [17] being arranged in the interior of the shell [7, 9] for projecting the luminous radiation through the interior onto the shell [7, 9], the shell being translucent and being visible from the outside, at least one lead-through [at 22, for optical cable 23] being

arranged at the shell [7, 9] of the aircraft [1] for arranging of at least one turret [22], which is translucent and sealed against the interior of the shell [inherently from the cubes 22 in order to transmit light beam from device 17], and the at least one projection device [17] being exchangeably arranged in the at least one turret [22] (figures 1-5, abstract at page 1, page 6 lines 20-31, whole pages 7 and 8).

Regarding claim 28, Ockelmann discloses the at least light source [at 15] being arranged outside the shell [7, 9] in a loading area [12] of the aircraft [1] (figures 1 and 3, page 7 lines 5-17).

Regarding claims 29 and 43, Ockelmann discloses at least one light wave guide [fiber optics 23] being arranged along the shell [7, 9] (figure 3, page 8 lines 17-25).

Regarding claims 30 and 44, Ockelmann discloses at least one further projection device [17] for projecting luminous radiation in arbitrarily definable directions (figures 1, 3 and 4).

Regarding claims 31 and 45, Ockelmann discloses an airship (figure 1).

Regarding claims 32 and 46, Ockelmann discloses a laser light source [at 15] (figures 1 and 3, page 7 lines 14-20, page 9 lines 4-5).

Regarding claims 33 and 42, Ockelmann discloses at least one wave guide [23] for guiding the luminous radiation from the at least light source [at 15] to the at least one projection device [17] (figure 3).

Regarding claim 34, Ockelmann discloses the at least one projecting device [17] for projecting image [18] carrying luminous radiation (figures 1-4, page 7 lines 14-31, page 8 lines 1-4).

Regarding claim 35, Ockelmann discloses the at least one projection device [17] for projecting effect light (for an image, page 7 lines 14-31, page 8 lines 1-4).

Regarding claims 36, 37, 47 and 48, Ockelmann discloses the at least one projection device [17] for projecting spatial/moving pictures (page 7 lines 24-31, page 8 lines 1-4).

Regarding claim 38, Ockelmann discloses at least one light source [a laser bank, at 15] being housed in at least one projection device [15] (page 7 lines 14-20).

Regarding claims 39 and 49, Ockelmann discloses the at least one projection device for projecting image [18, 24] carrying luminous radiation which is simultaneous with external events [pictorial representations, advertising programs] (page 8 lines 1-4).

### ***Conclusion***

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Lee et al. [WO 99/54863] discloses element 5 sealed with a lens (figure 1, page 5 lines 20-22).
